

Happy New Year 2023

Information for MAs & IFATCA Reps

IMPORTANT: INVOICING 2023

Dear friends and colleagues,

Usually by now you will have received an invoice with the amount for your subscription to membership of the Federation for the coming year.

However, this year and into the future you will now receive that invoice on 01 June each year.

In discussions between the Executive Board, the Financial & Investments Committee, and our accountant/auditor, it was identified that by moving our invoice date to align with the financial year it would improve both our recording and reporting, making the Federation finances cleaner and easier to understand for all. A central pledge of my time as Executive Vice President Finance has been to make the finances more transparent and with greater clarity; this move is part of that promise.

What does this mean for you as one of our Member Associations? There will be no invoice, and therefore, no payment required until an invoice is issued in June 2023. Effectively, you will get 6 months membership free of charge while we adjust our process to the new date. After 3 successive positive annual financial results, I believe that IFATCA has sufficient funds to be able to cope with change. However, the risk is that the report of this financial year may be a negative outcome; something I hope to keep under control to minimise the risk to IFATCA.

Should you have any questions please do contact me at mark.taylor@ifatca.org

Thanks for your patience and understanding.

Mark Taylor,
Executive Vice-President Finance

New EUROCONTROL Analysis Paper: 2022, the year European aviation bounced back, & the outlook for 2023

2022 was the year European aviation weathered the storm, with the year closing on 9.3 million flights: 3.1 million more than last year, even if still 1.8 million fewer than 2019.

That represents a solid 83% of 2019 traffic, achieved despite the Omicron spike at the start of the year, and the invasion of Ukraine on 24 February, which continues to have huge socioeconomic impacts on all aspects of the European economy including aviation. In spite of these twin shocks, however, traffic steadily recovered to 86% of 2019 by May, with similar monthly traffic levels ever since.
