## Information for MAS & IFATCA Reps

IFALPA-IFATCA Joint Briefing Leaflet: Ankara-Nicosia FIR Boundary

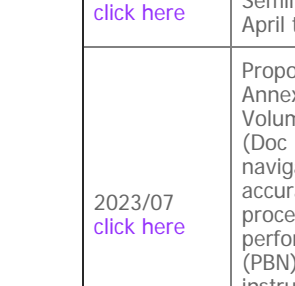

This joint IFALPA-IFATCA Briefing Leaflet, written in close cooperation with IFALPA's Member Associations in Cyprus and Türkiye, details the communication procedures that pilots should be familiar with when flying around the Ankara-Nicosia FIR boundary.

## European Region (EUR)

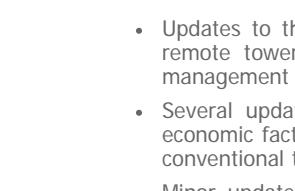

HAUKU 1st Dissemination Workshop Invitation

We are glad to announce the **1st HAUKU Dissemination Workshop**, to be held on **June 26th-27th, 2023 at EUROCONTROL (Brussels)**.  
During the workshop, we will address the question: **What can we really expect from AI in aviation, in 2030 and beyond?**  
HAUKU will present insights on the future of aviation, the related key challenges and the potential for AI applications in this safety-critical industry. A range of experts from all aviation segments – ATM, Cockpit, UATM, Airport – will join the discussion.  
Furthermore, HAUKU will request the participants' feedback to rank a set of Intelligent Assistant Concepts, to agree on the most promising and desirable avenues for AI application in aviation.  
We hope you will be able to join us - Click THE LINK AT BOTTOM to register (limited seats available)

## INVIRCAT - final project newsletter released

In this issue, we are happy to provide you with an overview of what INVIRCAT has achieved and produced with regards to the integration of remotely piloted aircraft systems (#RPAS #drones) into the existing Air Traffic Control (ATC) procedures and infrastructures within Terminal Maneuvering Areas (TMA) under the existing flight rules (IFR). We also highlight the role of the project in the broader context of the European ATM Master Plan and SESAR 3 JU research.

## ATM/ANS TEC: Publication of ED Decision 2023/005/R 'Guidance material on remote aerodrome traffic services — Issue 3'

The European Union Aviation Safety Agency has published ED Decision 2023/005/R amending the existing EASA guidance material on remote aerodrome air traffic services (ATS), commonly known as Remote Towers'. See at: **ED Decision 2023/005/R - Guidance material on remote aerodrome traffic services — Issue 3 | EASA (europa.eu)**.

The concept of Remote Towers enables the provision of aerodrome ATS from locations or facilities where direct visual observation is not available, and is based on a view of the aerodrome and its vicinity through means of technology. This concept is considered as one of the most relevant novelties introduced in ATM/ANS over the last decade, whose implementation is being facilitated by dedicated guidance material which has been developed and is being maintained by EASA since 2014, in cooperation with a dedicated rulemaking group composed of affected stakeholders' representatives. The EASA guidance builds on the existing EU regulatory framework and considers and addresses a variety of relevant aspects of designing, implementing and operating remote towers.

This ED Decision provides a comprehensive update considering additional research outcomes, implementation experiences, development of technical systems standards and the evolution of the various related regulatory frameworks (e.g. ATM/ANS Common Requirements, ATCO licensing, SERA, Aerodromes).

In this context, the most relevant aspects of this update concern:

- Updates to the chapter 'operational context' with new experiences from the daily operation of a remote tower centre, including the introduction of a supervisor role and experience related to management of competency for controllers with several unit endorsements.
- Several updates in the chapter 'management of change' including a new segment on socio-economic factors, one on the involvement of users and a segment dedicated to the migration from a conventional tower to a remote contingency tower.
- Minor updates throughout the document including a review of references to reflect updated EU regulatory material since the last publication.

For the future EASA will continue the work with remote aerodrome ATS by formation of an expert group to facilitate input from different stakeholders with experience from remote aerodrome ATS as well as to monitor the developments and needs for update to the rules or guidance material.

## Roadmap on Higher Airspace Operations (HAO) Proposed by EASA

**Issue 41 – March 2023**

EASA has published a Proposal for a Roadmap on Higher Airspace Operations (HAO) exploring the challenges of future operations in the airspace above FL550.

As HAO may pose safety, security and environmental risks, EASA created a Task Force composed of European Member States, the European Defence Agency (EDA) and Eurocontrol. This Roadmap summarises the work undertaken by the task force team in the last two years to ensure a uniform approach to safety, security and sustainability of air transport in the EU also in this domain.

## EASA Artificial Intelligence Days - High Level Conference

**Hybrid event (partially online and partially on-site meeting)**

Join us at the EASA Artificial Intelligence (AI) Days where we will pave the way for the future of AI in aviation with the unveiling of the EASA AI Roadmap 2.0. We will also engage in meaningful discussions with industry leaders and researchers at the MLEAP Stakeholder's Day.

Event dates:

16/05/2023, 09:30 - 16:30 CET (UTC +1)

17/05/2023, 08:45 - 14:00 CET (UTC +1)

Location:

EASA Headquarters

Konrad-Adenauer-Ufer 3

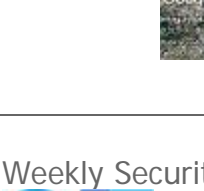

50668 Köln

Germany

## ATM News March 2023

Welcome to ATM News, featuring February's updates, developments and opportunities from our members and CANSO.

#### NEWS

- Saudi Air Navigation Services and NATS sign Memorandum of Understanding
- New NAV Portugal AIS website
- Slovenia Control appoints new CEO
- India implementing the world's most advanced digital remote tower for HungaroControl at Budapest airport
- Immarsat and Heron to enable uncrewed aircraft in Singaporean airspace
- ENDA is set to improve flight capacity and safety in India with a pioneering system that centralises all air traffic surveillance and management phases
- ENDA will invest 9.5 million euros to transfer and virtualise air traffic control systems supported by Voice over IP
- Sita's Datalink services are set to improve airspace efficiency in Serbia and Montenegro
- FREQUENTIS and LVNL extend integrated tower solution at Amsterdam Schiphol airport
- ENAIRE implements the AMBAR Project at the Adolfo Suárez Madrid-Barajas Airport
- Hong Kong selects Airconfor for air traffic flow management

#### CANSO NEWS

- ACI World and CANSO sign a Memorandum of Understanding
- ATM Awards 2022 Winners Announced!
- CANSO and Infina sign a partnership offering virtual training to the aviation community
- Skyguide receives world first Air Navigation Service Provider GreenATM Award

#### VIEWES

- Miguel Caparros, Director of Air Traffic Control Training in FTEJerez, Spain, discusses the challenges of virtual training in a post-COVID-19 world.
- Raine Luojus, CEO of Fintraffic ANS, addresses how ATCOs could provide their services across current geographical boundaries in order to provide more capacity..

#### CANSO EVENTS

- CANSO GLOBAL ATM SUMMIT AND AGM
- 7-9 June, Berlin, Germany

## Thank you for helping us celebrate the women of aviation

## Thank you for your contributions to our industry

## CANSO

As you know, March is Women's History Month, and we recently celebrated International Women's Day on 8 March. It was an opportunity to recognise and celebrate the contributions of women throughout history and in our present day.

Historically, women have played a crucial role in advancing the field of aviation. Today, they are making their mark as pilots, engineers, air traffic controllers, and in many other positions in the industry. We are proud to celebrate their achievements during Women's History Month and beyond.

I want to take a moment to thank everyone who sent in their photos for our Women's History Month campaign. We were overwhelmed with the number of submissions and were delighted to see so many talented and accomplished women in our industry.

Unfortunately, we received so many photos that it was only possible to include all pictures received by 6 March. However, please know that we appreciate your contributions and are proud to prioritise diversity and inclusion in all aspects of our work.

Once again, thank you for your participation in our Women's History Month celebration. Let us continue to honour the achievements of women and work towards a more inclusive and equitable future.

## Final report into March 2019 crash of Ethiopian Airlines ET302 contains new safety recommendations

On 10 March 2019, the left stick shaker of an aircraft activated immediately after takeoff from Addis Ababa for no apparent reason and remained on. A succession of four pitch down maneuvers not initiated by the crew subsequently occurred and recovery from the final one was not achieved. Terrain impact followed a high speed dive six minutes after takeoff. The investigation attributed the loss of control to an erroneous single source angle of attack input to the Maneuvering Characteristics Augmentation System (MCAS) from which, in the absence of an applicable non-normal procedure or appropriate training, recovery was not achievable.

### A Single European Military Sky

For well over than a decade – it feels like for ever – we have been told that as much as the States of Europe would love, love, a single European sky, the military will just not consent. All the other issues can be sorted out – it is just money, after all – but the Council says, solemn-faced, we cannot get our forces to agree. You must understand, they intone: Sovereignty, you see, at the end of the day is about defence. Defence, no-one can question that. The chaps in uniform are simply impossible to deal with, says the Minister of [INSERT COUNTRY NAME HERE], with the ANSP slightly out-of-shot, grinning like the Cheshire Cat.
