

## ICAO Global

### Webinar: ICAO MID Office Regional Innovation

ICAO

ICAO MID Office is organizing a Regional Innovation Webinar on **29 August 2022**. This webinar is the regional component of the ICAO 2022 Innovation Fair. With a specific focus on the MID region, the objectives of the webinar are to showcase innovations in aviation that have the potential to:

1. Help progress on the ICAO Strategic Objectives
2. Deliver on the United Nations Sustainable Development Goals
3. Enable the recovery and resilience of the aviation system

The webinar will help you understand new technologies' opportunities and challenges. We will explore innovation lessons learned based on regional examples. This webinar will feed the wider discussion on "Innovation for Enhanced Resilience in International Civil Aviation," which will be held in Montréal, Canada, from 24 to 26 September.

## European Region (EUR)

### Our new EUROCONTROL Conference asks industry leaders "Where to next for European aviation?"

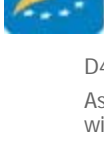

Is European aviation really on track? Yes, we're back to around 90% of pre-pandemic traffic levels – but 2022, and especially the busy summer season, has been hugely turbulent. Staff shortages across the value chain as traffic recovered swiftly have created a perfect storm for travellers, with a dramatic decline in punctuality. And the short-term outlook has become increasingly challenging, with fuel costs and inflation spiralling upwards as Putin's war of aggression in Ukraine drags on, threatening a difficult winter for aviation and for Europe's citizens.

To take us through a rollercoaster year so far and identify what needs fixing immediately, as well as examine the big trends for the medium term, we've lined up a stellar cast of industry thought-leaders for our latest one-day Conference at EUROCONTROL's Brussels HQ on 4 October 2022.

### World premiere at Frankfurt Airport: satellite-based precision landings possible even in bad weather

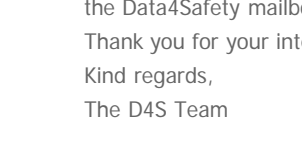

On 14 July 2022, DFS, the German air navigation service provider, started the use of the GBAS precision landing system for poor weather conditions at Frankfurt Airport. This is the first system of its kind in the world.

DFS has been operating digital precision landing systems, known as Ground Based Augmentation Systems (GBAS), at Bremen Airport since 2012 and at Frankfurt Airport since 2014. GBAS is the term used to describe navigation by satellite, but combined with a ground-based supplementary, or augmentation, system. Only this combination gives the accuracy required for precision landings.

### D4S Webinar "Delivery of the Proof of Concept phase"

D4S Webinar "Delivery of the D4S Proof of Concept phase" held on the 25th of August 2022.

As announced during the session, please find here-after a recap of the practical pieces of information shared with you during the webinar:

- Interested to attend the **D4S Information Session** on the 15th of September in Brussels [[On-site event](#)]? You can find more details about the event and how to register on the [D4S Information Session Event webpage](#).
- Interested by the **SAFE360° Event** scheduled over the 13th, 14th and 15th of September in Brussels [[On-site event](#)]? You can find more details about the event and how to register on the [SAFE 360° Event webpage](#).
- Want to know more about Data4Safety or watch again the D4S Video displayed during the webinar or the webinar itself in case you missed it? Check the [D4S Webpage](#)!
- A **question** about the Data4Safety Programme? Reach out to us at [data4safety@easa.europa.eu](mailto:data4safety@easa.europa.eu)

Please note that a lot of very good questions were logged by the Participants in the chat during the webinar and that they have been well-captured by the D4S Team. We will consider them further to prepare the D4S Information Session scheduled on the 15th of September in Brussels. May you have some specific questions that you would like to be considered by the D4S team in addition, please do not hesitate to contact us using the Data4Safety mailbox.

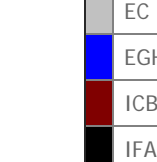

Thank you for your interest in the Data4Safety Programme!

Kind regards,

The D4S Team
